Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	21 September 2026	**Student Name**	Pasapu Vineela
Team ID	Individual Project	**Regd. No.**	23KD1A05I0
Project Name	ServiceNow-Based Employee Laptop Request Application	**College**	Lendi Institute of Engineering and Technology
Maximum Marks	4 Marks		

Functional Requirements

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)	User Stories
FR-1	Laptop Request Submission	• Request through the Laptop Request Form (Record Producer on the Service Portal) • Auto-number for unique request identification • Requester, Manager and Employee Email captured (reference to User table) • Request Date and Short Description captured	USN-1, 2, 5
FR-2	Request Type and Reason	• Type of Request: Basic (personal or general office use) or Advance (software development or technical work) • Reason: Software Development, Personal Use or Other, captured for justification	USN-3, 4
FR-3	Request Validation	• One laptop request per employee per year is enforced • Default values and field validations • Error handling and message for duplicate requests	USN-6
FR-4	Status Tracking	• Status: Pending Approval, Approved, Rejected • Employees can view the status of their requests	USN-7
FR-5	Approval	• Approval task sent to the manager • Approve or reject with status update and accountability	USN-10, 11
FR-6	Notifications	• Email notification on submission • Email notification on approval or rejection	USN-8, 9
FR-7	Fulfilment and Reporting	• Task assignment to the IT team for approved requests • Reports and dashboard by status, type and reason	USN-12, 13
FR-8	Security and Configuration	• Role-based access control (employee, manager, IT, administrator) • Custom application scope and Update Set for all artifacts	USN-14, 15

Non-functional Requirements

Following are the non-functional requirements of the proposed solution.

NFR No.	Non-Functional Requirement	Description
NFR-1	Usability	Simple, user-friendly Service Portal form with clear fields and choice lists, usable on Chrome, Edge or Firefox with no training.
NFR-2	Security	Role-based access control and ACLs so employees see only their own requests; authenticated access; all artifacts inside a scoped application; HTTPS access to the instance.
NFR-3	Reliability	Server-side validations and the one-request-per-year rule keep data consistent; every request is stored with a unique number and status; configuration is captured in an Update Set.
NFR-4	Performance	Lightweight form and server-side business rules so a request is submitted and validated within a few seconds under normal load.

NFR No.	Non-Functional Requirement	Description
NFR-5	Availability	Hosted on the ServiceNow cloud platform, available through a browser whenever the instance is up, with availability managed by the platform provider.
NFR-6	Scalability	Table-based data model and scoped application can handle growth in employees and requests, and can be extended with approvals, notifications and reporting.
