Define the Problem Statements

Ideation Phase

Date	21 September 2026
Team ID	
Project Name	ServiceNow-Based Employee Laptop Request Application
Maximum Marks	2 Marks

Customer Problem Statement Template:

Create problem statements to understand the employee's point of view. A well-articulated problem statement helps the project team understand the challenges employees face while requesting a laptop and helps define a suitable ServiceNow solution using a Record Producer, Flow Designer approval, business rules and role-based security.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	an employee	request a laptop for personal/general office use (Basic) or for software development/technical work (Advance)	I currently have to rely on email or informal communication	there is no standardized form to capture the request type and the reason for the request	uncertain whether my request was recorded and who will approve it
PS-2	an employee	know the current status of my laptop request (Pending Approval, Approved or Rejected)	status updates are not visible and approvals take long	requests are tracked manually with no central record	frustrated by delays and repeated follow-ups
PS-3	an IT manager	review and approve laptop requests fairly	duplicate and repeated requests are submitted	there is no automatic check that enforces one request per employee per year	overloaded and unable to enforce the policy consistently
PS-4	an IT employee	create and manage laptop requests securely	access to records is not controlled	roles, groups and ACLs are not defined for the process	concerned about data security and accountability
