EMPLOYEE LAPTOP REQUEST APPLICATION

Customer Journey Map — Employee requests and tracks a laptop

SCENARIO An employee needs a laptop for work, submits a request through the ServiceNow Service Portal, and follows it through approval to the final decision.

JOURNEY ROW	1. Discover	2. Access	3. Select	4. Describe	5. Submit	6. Track	7. Approve	8. Feedback
STEPS	Find where to request a laptop	Open the Laptop Request page in the portal	Choose Basic or Advance request type	Enter the reason for the request	Review the details and submit the form	Return to the portal to check the request status	Wait for the IT Manager's decision	Review the outcome and give feedback if available
EMPLOYEE ACTIONS	Ask a manager or colleague, or look for the portal link	Sign in and open the Request a Laptop card	Select the type that matches the work to be done	Explain why a laptop is needed	Submit and note the request number	Check Pending Approval, Approved or Rejected	Provide extra information if asked	Confirm whether the request was handled
TOUCHPOINTS	Internal instructions, manager, intranet	ServiceNow Service Portal, Request Laptop card	Request Type choice on the Record Producer	Reason field and form guidance	Submit button, confirmation, created record	Portal page or request record (as configured)	Flow Designer approval, IT Manager	Approved or Rejected status, feedback mechanism (if configured)
GOALS & MOTIVATIONS	Know the correct place to request a laptop	Reach the form quickly	Choose the right request type	Explain the need clearly and convincingly	Submit successfully and know it was recorded	Know the current status and what happens next	Get a timely, fair decision	Feel the request was handled properly
POSITIVE MOMENTS	Clear instructions are easy to find	Portal page is easy to access	Request types are easy to understand	Helpful field labels guide the entry	Form accepts the request and confirms it	Status is visible and understandable	Decision is clear and explained	Outcome is communicated clearly
PAIN POINTS / NEGATIVE MOMENTS	Employee does not know whether to email or use the portal	Portal link or page is hard to find	Employee is unsure if technical work counts as Advance	Not clear how much detail the reason needs	A second request in the same year is blocked without a clear message	No visible update makes the employee feel ignored	Slow approval, or rejection without a reason	Unclear next step after approval; no feedback option
AREAS OF OPPORTUNITY	Provide a clear portal entry point and short instructions	Keep the page simple and mobile-friendly	Show examples next to Basic and Advance	Add guidance text and mark required fields	Show a clear message and the request reference number	Display status, approver and latest update	Add notifications, reminders and a rejection reason	Add next-step information and a simple feedback step

Project note: This map reflects the planned Employee Laptop Request workflow using a ServiceNow custom table, Record Producer, business rule, Flow Designer approval and Service Portal. Items such as notifications, visible approver, rejection reasons and feedback should be described as implemented only if they are present in the final instance; otherwise treat them as improvement opportunities.
